runs fine but i cant connect to net at all Draton: you'll need to use a newer version of ubuntu and install it manually Seveas: i am on a liveUSB I do believe that's where that situation is happening. But I don't have the information to confirm. Seveas: i am on ubuntu 12.10 from this liveUSB i can go to synaptic and search for gstreamer and then install Seveas: how is this a different situation? I'm saying I don't know, I don't know. the situation is, i need the correct package installed, not just the newest one !find libSDL1.2debian Found: libSDL-ttf2.0-0, libSDL-ttf2.0-0-dbg, libSDL-ttf2.0-dev, libSDL-ttf2.0-doc !find libSDL-mixer1.2 Found: libSDL-mixer-1.2, libSDL-mixer1.2-dbg libSDL1.2debian and libSDL-mixer1.2 should both install gstreamer-plugins-base-apps and be all you need. Seveas: ok I don't know if they ship with an older version though, so you might need to do some research. But they should be installable Seveas: i will give that a shot Draton: maybe a real debian user can help you, I'm not familiar with that Seveas: but i am on a liveUSB, it's a seperate liveUSB from the OS i am actually installing Draton: does gstreamer0.10-plugins-good not do the job? Seveas: no then that's the problem :) is there a gui way to install gstreamer? f3e1b3768c
